

Firefighting Hose Yagom

YAGOM is an all synthetic woven textile reinforced encased in a special compounded high tensile rubber forming a unified lining and cover completely protected from hazards. The external finish is a ribbed pattern aiding both abrasion resistance and handling qualities.

Standard brick red color, available also in other colors (minimum order quantity requested). Particularly suitable for use and contact with acids and strong bases.

Professional use hose suitable for refineries and chemical industry

- Very high abrasion resistant
- It is approved by ENI National Italian Oil Corporation 0198.00 type C ; compliant with the standards DIN 14811 - BS 6391:2009 type 3 - prEN 1924 class 4.

The model Yagom is available with the certificate UL (available on minimum quantities)

Warp	High tenacity polyester											
Weft	High tenacity polyamide											
Internal lining	NVC rubber compound											
Outer cover	Synthetic ribbed rubber compound
