

Firefighters Boot "FIAMMA" Type C

Lateral Malleous'
Reinforcement

Bellow

Carved Sole

Firefighting boot type C made of soft black grain leather 1.8-2.0 mm thick with water repellent treatment. Inner lining in hypoallergenic, breathable, water repellent WINDTEX fabric.

Principal Features:

- Padded leather upper collar
- Anti-perforation insole in MATRIX multilayer fabric (Kevlar)
- Anatomical insole in THINSULATE
- Steel toe cap (or aluminum on request) with 200 J resistance
- Special grass spike made with a particular abrasion resistant process
- Intrinsically fireproof aramid fiber closure laces
- Reinforced central closing hinge for quick removal
- Internal Fussbett in THINSULATE
- Non-slip nitrile rubber sole with grooves for rough terrain, high heat resistance above 300°, maximum insulation from the cold, oil and hydrocarbon resistance
- Malleolus protection through double reinforcement and padding; reinforcement in anti-perforation fabric on the sides
- Inserts on the back in yellow reflective fireproof fabric
- Tongue and rear gusset for maximum comfort

Height of the boot (size 42) 27 cm
Pair weight boots (size 42) kg. 2.08
