

Fire Swatter

Wooden handle or aluminum handle, available in the length of mt. 1.20 (only on demand of 1.00 and 1.40 mt), complete with double handle in soft rubber, one positioned at the end of the handle and one positioned at about cm. 50 from the end, plus wrist strap.

Complete with n°8 flaps in fire retardant fabric, each with height of mm 40 and minimum length of mm 700, consisting of strips in high-resistance fireproof material, connected to the handle by means of a steel safety clamp insulated from the textile part with a layer of aluminized fabric.

Each door has a steel rivet at its end in rivet which prevents it from fraying during fire fighting operations.

Handle		Code
Wooden 120 cm.	n.8 h. 40 cm.	70.0101.003
Alluminium 120 cm.	n.8 h. 40 cm.	70.0101.007
