

## WATER SHIELD CURTAIN NOZZLE

**Water Shield** is an essential tool for every fire brigade equipment.

The curtain nozzle of water generated by it, creates excellent protection from radiant heat, flames, smoke or gas for operators, their vehicles and their equipment.

Water Shield thanks to its size and lightness, can be repositioned during extinguishing operations, depending on changes in the fire front to maintain optimal protection.

Two models are available: Ø 45 or Ø 70 inlet which provide respectively 1.100 l/min and 1.700 l/min of flow at 8 bar.

Made of aluminum they are easily transportable.

To facilitate deployment, the units are equipped with comfortable carrying handles and, once placed on the ground, the reaction force of the water holds the body securely in place.

Water Shield generates **a curtain of nebulized water** with a radius of approximately 5 mt.

## 10 ANTINCENDIO

Safco Italia s.r.l. si riserva il diritto di apportare in ogni momento ai propri prodotti le modifiche tecniche ritenute più opportune. Le fotografie possono presentare alcune differenze rispetto al prodotto originale.

Water Shield placed at pre-established intervals around the operational area can be used to form a **continuous shield of heat and gas protection** letting firefighters safe to operate equipment from behind the wall of water.

**Note:** All widths and heights are approximate and may vary significantly based on operating conditions.

Wind can have a significant effect on the width and height of the water curtain.

Coupling	Nominal Flow rate	Dimensions (l.w.h)	Weight (kg.)	Code
UNI 45	1.100 lt/min	230x260x132	1,29	10.0305.006
UNI 70	1.700 lt/min	230x260x132	1,45	10.0305.007
