

## HARNES GOLDEN TOP PLUS FOR FIRE-FIGHTERS

Suspension and positioning harness with a minimalist construction, offers the functional features of the more advanced rope access models.

Ventral attachment characterized by two concentric rings: one for housing the steel ring for connecting lanyards and tools, and one for connecting the chest harness and ventral ascender.

Connector equipped with anti-rotation lever.

Tensioning strap for ventral ascender.

Release buckles mounted on the leg loops.

N° 5 steel attachment rings: sternal and dorsal for fall arrest, ventral for suspension, lateral for positioning and retention.

Equipped with NFC TRACK chip for digital identification.

Available in two sizes.
