

### GLOVE PATRIOT FIREPROOF - FOR FIREFIGHTERS

The Patriot Fireproof glove is strictly indicated for direct use in firefighting, and equally during recovery and rescue operations.

The glove guarantees insulation from heat and cold. It has contact heat resistance up to 250°C. It offers a high level of comfort, effective grip and excellent protection against mechanical risks. Thanks to its Hipora insert the glove is breathable.

It is made entirely of water-repellent 100% aramid (Nomex) Twill fabric.

The joint of the fingers, knuckles and fingertips are reinforced with a particularly resistant Kevlar mesh fabric, with a flame-retardant silicone coating. Internally, a layer of 100% Kevlar, a waterproof, breathable, windproof membrane and a fireproof cotton lining give to the glove maximum comfort and protection.

It is equipped with a cuff fastener, a double-coloured reflective band and a special hook with carabiner.

Length: about 38 cm.

Available Sizes: from 6 to 13.

Available Colours: blue navy (only on request in red or beige)

Certified according to: **EN 659 + A1 + AC:2009** - PPE of III category.

Protection levels: **3** (abrasion) - **5** (cut) - **4** (tear) - **3** (puncture) - **4** (fire) - **5** (dexterity)
