

## RUBBER BOOTS for FIREFIGHTERS “FHR”

Rubber boots for firefighters with electrical insulation properties (equipped with removable insulating thermal sock). Additional feature only for the mod. FHR 004: chainsaw protection (front area of boot protected by chainsaw cut up to 28 m / s - level 3).

### Features:

- Third grade thermal resistance (HI3)
- Steel toe cap (SB)
- Electrical insulation properties - class 0
- Resistance to chainsaw cutting - level 3 (model FHR 004)
- Pierce-proof soles (P)
- Slip resistance (SRA) and oil resistance (FO)
- High temperature resistance (HRO) - uppers resistant to flame and heat radiation
- Heel energy absorption (E) above 20 J
- Sole assembly heat insulation (HI)
- Water penetration protection
- Good user visibility thanks to reflective tapes at the back
- Colour: yellow and black
- Available sizes: from 37 to 48

### Certified according to the following standards:

- EN 15090:2012** - Boots for firefighters
- EN 50321:1999** - Electrical insulation footwear for the works on low voltage installations
- EN 17249:2013 + AC:2014** - Safety boots with resistance to chainsaw cutting level 3 (*only for the model FHR 004*)
- EN 20345:2011** - Personal safety equipment - safety boots

Mod. FHR003 with electrical insulation: **Code 80.0401.015**

Mod. FHR004 with electrical insulation and chainsaw protection: **Code 80.0401.014**
