

## Low/Medium Expansion Foam Adapter for G-Force PN16 Nozzle (cod.10.0307.014)

Low/Medium Air-aspirating foam-making adapter for all 1.5" (38 mm) G-Force nozzles.

It's constructed of durable UV stabilized polyethylene and aluminium. Resistant and lightweight - only 2,4 kg - It allows for a wider selection of foam concentrates to be used and has the unique ability to vary the expansion ratio and stream reach of the finished foam.

As the nozzle shaper is rotated to the wide for position (counter clockwise), **higher expansions** will be produced but with reduced stream reach. Rotating the nozzle shaper forward to straight stream (clockwise) will produce **lower expansions** but with increased stream reach.

*TFT cod. FJ-MX-G*
