

TFT Blitz Force portable monitor complete of the nozzle and the bracket (cod. XXLG-32 kit represented in photo below indicated)

The BLITZ FORCE is one of Task Force Tips' innovative, lightweight and highly versatile portable attack monitors. Rated up to 2000 l/min, Blitz Force integrates a low loss waterway with positive locking valve control and a corrosion preventing anodized and powder coat finish.

Made of a particular light alloy, it is treated with a special anodization resistant to the saline solution of acids and atmospheric agents, it is then further protected by a powder coating.

An exclusive high strength tie-down strap and carbide tipped folding legs offer an extreme stability in varying fire environments.

The Blitz Force monitor has a horizontal adjustment of 20° on both the sides with respect to its axis, for a total of 40° and a vertical adjustment of from +20° to +60°.

The monitor is supplied complete with the dispensing head with fractional and nebulised full jet adjustment, a bracket for its mounting on the vehicle in stainless steel and a wide range of heads that can be mounted for dispensing. The monitor can also dispense foam without the use of adapters.

Power connection: **UNI 70**

Weight: 7 kg.

Availability to equip the monitor with multiple heads and different characteristics, automatic, fixed flow, variable pressure.

Dimensions of the closed monitor: 375x230x240 mm. / open: 380x655x254 mm.

Maximum pressure: **20 bar** / operating pressure: **7 bar**.

Maximum flow rate: 2000 liters per minute.

Also available in the self-oscillating version
