

## Gallonage Nozzle QUADRACUP (cod.10.0302.017)

QUADRACUP is a rugged and dependable selectable gallonage nozzle with a retractable foam aspiration sleeve, available in either tip-only configuration or with a stainless ball shutoff. When the outer sleeve is in the retracted position (A), the nozzle operates as a selectable gallonage nozzle. When the sleeves is in the extended position (B), it will be possible to generate foam with high efficiency. Flow can be set to any one of four flow settings (110-230-360-470 l/min. a 7 bar + Flush mode (cleaning). Rotating the front end we can select also the modes of the full, fractional or nebulised jet of the nozzle. Body made of anodized aluminium resistant to marine solution and acids, assembled with extremely light components, equipped with a stainless steel ball shut-off valve, and pistol grip mounted under the valve. 1.5" swivel female connection as standard.
