

G-Force Nozzle PN-16-T3 Selectable Flow with Grip (cod. 10.0302.015)

TASK FORCE TIPS®
FIRE FIGHTING EQUIPMENT

G-Force selectable nozzle with 5 flow settings:100-200-300-400-500 LPM, operating pressure 6 bar.

Lightweight hard anodized aluminium alloy body, high resistance to acids and saline, equipped with shut-off valve type “*SLIDE VALVE*” with grip: this type of valve guarantees the maximum reduction of turbulences and pressure drops.

Fixed Teeth covered in impact-resistance material, anti-slip pistol grip, fractionated and nebulised full jet selector, purge position.

The nozzle is supplied with an Integral tactile indicator that identifies the selected jet even if in absence of visibility and in particular the optimal jet for cooling calibrated on 45° angle.

The nozzle is capable of delivering AFFF foaming agents even without the use of adapters.

On request, The nozzle can be supplied with UNI / STORZ swivel connection.
