

Nozzles for CAFS systems - VORTEX E FP100

Nozzle model VORTEX SVFG made of anodized aluminium with ball valve regulated by a plastic handle. With 1.5" F swivel connection, threaded head for coupling nozzles of various diameters of: 12, 16, 19, 22, 24, 25, 27, 28, 30, 32 mm.

Characterized by a particular mechanism activated by the rotation of the head, it increases the turbulence inside the water passage chamber, improving the density of the foam generated by the CAFS system.

Model FP100 lance made of anodized aluminium with ball valve regulated by a plastic handle. With 1.5" F swivel connection, threaded head for coupling nozzles of various diameters of: 16, 22, 24, 25, 28, 30 mm.
