

Fire-fighting Hose H.P. JET 38 - 45

Fire-fighting Hose High Pressure : external circular weave layer of high tenacity polyester thread; elastometric waterproofing; special textile to maintain high performance.

For special needs where higher pressure is required, JET H.P. hose is the best solution, with operating pressures **up to 40 bar**.

In particular in forest firefighting where micronization of the jet is appropriate to optimize the cooling effect in the presence of limited flow rates.

The special textile armor has been designed to maintain the high characteristics of flexibility and manageability.

Hose with couplings UNI 45 MT 20 **code 10.0201.034**

Hose with couplings STORZ 38 (brass) MT 20 **code 10.0202.010**
