

NEW WILDAND FIREFIGHTING SUIT *SAHARA*

Wildland fire-fighting suit consisting of jacket and trousers, made entirely of 185 g / m² ± 5% Aramid fabric as follows: 93% meta-aramid, 5% para-aramid, 2% **Oeko-tex®** antistatic fiber. RIPSTOP anti-tear fabric processing, with antibacterial, hydro-oil repellent treatment.

Anti-cut and wear-resistant reinforcements on elbows, knees, shoulders, ankles, cuffs and bottom of pants, made of para-aramid fabric covered in 380 gr / m² carbon silicone. All reinforced parts, have an additional layer of anti-cut fabric 93 % meta-aramid, 5% para-aramid, 2% antistatic fiber 180g.

Jacket with set-in sleeves, elasticated wrist with fastener adjustment system, reinforcements on shoulders, elbows and sleeve bottom in wear-resistant waterproof silicone fabric.

AMERICA type high collar (high protection) with throat protection closure stopped by fastener covered in non-slip silicone fabric. Front closure with quick-release fireproof zipper mounted on black aramid fabric, protected by an external flap and an internal flap underneath. The jacket has a rear stretch of the fabric (tail) that guarantees maximum back protection.

n. 2 pockets positioned frontally on the bottom of the jacket with triple bellows closed by zipper and protected by flaps with pullers in black silicone FR fabric.

1 radio pocket positioned on the left side chest, 1 torch holder fastener closed by velcro on the right side.

Certified perforated TRIM yellow and grey reflective stripes, positioned on the bottom of the jacket on the chest lap, on the cuffs and on the arm, + two longitudinal bands on the back
