

Multi-purpose hatchet *Inforest*

It is a personal use tool for structure fire or rescue tasks.
It integrates 3 main functions: a straight-bit axe, a pick with a pointed end, and a crowbar to force entrance or to open fire hydrants.

In the upper area, it has a slot to use the tool as a lever in the opening and closing of valves, and to force open padlocks and other obstacles in the fire.

The body is made of steel hardened through heat treatment. It has a grip in the handle that absorbs vibration.

It is a practical and easy-to-handle object ideal for work in confined spaces.

Weight: 1,4 kg
Length: 370 mm
Material: 1045 steel

Code 70.0101.063
