

Foldable Tanks

Description

Flexible tank type G, with a circular section and a floating rim, is made with polyester fabric coated on both faces with plastomers. The tank is foldable and can be stored after use in reduced spaces.

Usage

This type of tank is suitable to contain water and fuels. Its use is particularly indicated when the installation of rigid permanent tanks is not convenient.

Operating temperature: +60°C.

Storage conditions: -10°C +60°C.

Standard capacity: from 1 to 20 m³.

Accessories included

- 2 inch valve for loading.
- Drain with 60 mm hose connector.
- Repair kit.

Optional accessories (separately)

- Support tarpaulin.
- Transport bag.
- Cover.
