

HIDRO-WICK HELI-TRANSPORTABLE TANKS

These Hydro-Wick® Fireflyers™ are widely used by the Forest Service to transport water, foam or potable water to remote locations by helicopter.

The streamlined, compact and flexible containers are made of robust PVC-coated fabric. Complete with 4"/102 mm union, and closing valve, standard GHT hose with "0" ring for attachment to the pear-shaped helicopter to resist unrolling

Model	Capacity	Empty weight	Fully loaded weight
FP60	273 liters	5,9 kg	278 kg
FP110	500 liters	7,7 kg	507 kg
