

NEW WILDLAND FIREFIGHTING OVERALL

COMBAT model overall made of intrinsically fireproof, Rip-Stop (anti-tear), IOR (water and oil repellent) fabric. Composition: 93% meta-aramid, 5% para-aramid, 2% antistatic fiber of 180 g/m². Oeko-tex®.

One-piece overall with set-in sleeves to ensure maximum mobility of the arms; reinforcements with doubling of the fabric near the elbows and forearms; elastic wrist straps. AMERICA- type high collar for throat high protection with closure by hook and loop fastener stopped by Velcro® F.R. Front closure with two-way brass zip protected by an external flap blocked with sections of Velcro® F.R. and internal underlay.

The suit has 1 radio pocket applied on the chest closed with flaps fixed by Velcro® FR, double fastener applied on the chest with special Velcro closure for torch.

2 large leg pockets with triple bellows closed by Velcro fastened flap. Elasticated sides. Increased protection with doubling of fabric near the knee and in the groin area.

Bellows on the elasticated bottom leg and closure with brass zip protected by flap blocked with Velcro FR., anti-wear edge in carbon silicone Kevlar.

The suit is equipped with certified yellow stripes for combined performance (fluorescent and retroreflective) height cm. 5 positioned: double armhole, chest round and double leg round.

The seams were made entirely with meta-aramid sewing threads, double needle structural stitching.
